1. **THE PROJECT.** The Town of Howey-in-the-Hills (the “Town”) located at 101 North Palm Avenue is issuing a Request for Proposals (RFP) for deck replacement on the town fishing Pier, which is approximately 165 ft. long by 16 ft wide. The Pier will need to be field measured by contractor to verify exact dimensions. The Pier is located at Griffin Stormwater Park in Howey in the Hills.

The work will include the removal, disposal, and replacement of the existing wood walk boards, matching existing size and thickness using similar 2” x 6” marine grade #1 pressure treated decking lumber fastened to the existing 1/4” thick gal-aluminum structure with 2.5”, #10, high resistance #304 stainless steel fasteners.

The work will also include the removal, disposal and replacement of the existing wood 2” x 6” midrail and existing wood 2” x 8” handrail top cap to include all horizontal 2” x 6” stringers using similar 2” x 6” and 2” x 8” marine grade #1 pressure treated lumber fastened to the existing 4” x 6” wood support post with 3”, #10, high-resistance fasteners. The top rail will have 45-degree splices and must be rounded with no splinters.

All wood to have C-A copper-based preservative with organic fungicide. All wood needs to be sealed with Olympic maximum marine wood sealant, Thompson water seal VOC wood protection or similar grade. (Follow manufacturers recommendation for sealing application delay time after deck installation.)

If the diameter of the fasteners needs to be changed during the project due to conflicts with existing holes in the existing wood post or aluminum structure the contractor must submit the type, size and grade of fasteners to the Public Works Director for approval.
