

WATER METER POLICY

- All water meters shall be 1 inch or larger (depending on demand)
- Two meters are required on all new construction and must be purchased at time of permit. Both meters are to be installed at one time.
- Lot must be graded prior to meter installation. Meter location must be at side walk elevation.
- Potable water meter will have a 16-inch PVC pipe 1 inch in diameter stubbed out to allow the plumbing contractor to make final connection without removing the meter.
- Irrigation water meters will have a 16-inch PVC pipe 1 inch in diameter stubbed out with a 12-inch section turned up to allow a construction hose bib to be installed for water use.
- All water meter boxes will be double units with two meters in each.
