

Hello, my name is Juan D. Urquijo. I am a Boy Scout for Troop 254 located in Howey-In-The-Hills and I'm planning to create a picnic styled table that would provide a Chess and Checkers game board in the middle of the table. This would be the first table in the Howey Park that would offer a chess/checkers game instantly. On the table there would be the Chess/Checkers table and a box next to the game board. Inside the box will provide all the game pieces and a how to play manual created by me on how to play the both the games of Chess and Checkers.

This project will cost less than \$200 dollars. I will self-fund this project myself and I will have my mentor Jim Miller guide me through the process of bringing this idea to life. Mr. Miller will provide me the tools to build the table, and his van will be able to transport all the materials and supplies to the location of the site. My fellow Scouts in Troop 254 will help assist building the table. I plan to buy a paint that can last ten years on the table, and I will buy a high-quality game board. There will be a plethora of different types of measurements for the wood being used. 4x4 woods, 8x12 wood just to name a few measurements that would be used.

Preferably the table will be placed in the shade since the idea of the table is to have people playing games of chess and checkers on this table.

Thank You,

Sincerely,
