CHAPTER 1
FUTURE LAND USE ELEMENT

***It is important to note that the old Data and Analysis from the 1991 Comprehensive Plan is being superseded by new data and analysis presented below; however, the original Goals, Objectives, and Policies from the 1991 Comprehensive Plan have been included in this Element. This Element was updated accordingly to reflect the new planning period.

A. INTRODUCTION

1. Purpose

The purpose of the Future Land Use Element is the designation of future land use patterns as reflected in the goals, objectives and policies of the local government comprehensive plan elements.

The Future Land Use Element sets forth the physical plan for the future development of the Town. The Future Land Use Element describes the appropriate location for the future land uses and promulgates the policies regulating the location and development of all land uses. The Future Land Use Element sets forth not only the density and intensity of land uses, but also considers other factors affecting land use development, such as timing, cost, and current development trends.

While each Element within the Comprehensive Plan is important, the Future Land Use Element is arguably the most important as it must be consistent with all other Comprehensive Plan Elements and articulate the Goals, Objectives and Policies of these other Elements in the form of specific land use policies.

The Existing Land Use Map included as part of this Element, describes the location and distribution of land uses in Howey-in-the-Hills in 2010. The Future Land Use Map (also included in this Element) is the focus of the Comprehensive Plan. It indicates the proposed location and distribution of land uses in the year 2025. All policies contained within this Plan must be consistent with the Comprehensive Plan and the Future Land Use Map. All land development regulations in effect subsequent to the adoption of this Plan must be consistent with the Future Land Use Map.

This Plan Element is a required element; the minimum criteria for its contents are established in Rule 9J-5, F.A.C. This Plan Element was formulated to be consistent with those criteria as well as relevant sections of Chapter 163, Part II, F.S., the State Comprehensive Plan, and the Comprehensive East Central Florida Regional Policy Plan.

B. POPULATION ESTIMATES AND FORECASTS

In order to plan for growth, it is first necessary to project the number of persons that will reside in the Town. The effectiveness of a local government’s comprehensive plan depends principally on the accuracy of population projections for both resident and seasonal populations. These
predictions for the future are the basis of planning for future land use, housing, recreation and open space, and public services and infrastructure needs [9J-5.006(2)(c) and 9J-5.006(1)(g), F.A.C.].

Howey-in-the-Hills’ population has grown over the years. In 1990, the Town had a population of 724. By 2000, the population of Howey-in-the-Hills increased to 1,002. In 2008, the Town’s population increased to 1,216. Population projections prepared by the Shimberg Center for Affordable Housing indicate that Howey-in-the-Hills will have 378 new residents by the year 2025 (see Table 1).

C. **EXISTING CONDITIONS**

1. **Existing Land Use**

   The Town’s *Existing Land Use Map* was produced using Geographic Information Systems (GIS) data from the Lake County Property Appraiser. The amount of acreage located within the Town’s current boundaries is presented in Table 2 by the existing land use categories.

**Residential** - This category on the *Existing Land Use Map* denotes all land used for residential purposes, including single family, accessory apartments, rectories, and mobile home structures, but specifically excludes recreational vehicles, travel trailers, or similar vehicles. Single family residential use is permitted in all areas of the Town except the public use, recreational, industrial, and conservation areas in Town. The permitted density for residential lands in Howey-in-the-Hills is featured in Table 3 [9J-5.006(2)(c)(2), F.A.C.].

Adopted on October 11, 2010  
Ordinance No. 2010-007
**Commercial** - This category on the *Existing Land Use Map* denotes all land used for retail and wholesale trade, offices, restaurants, hotels and motels, and professional services. The majority of the commercial uses in Town are found along Central Avenue. Commercial land use is permitted in the Town Center Overlay, Town Center Mixed Use, Village Center Mixed Use, and Neighborhood Commercial. The maximum intensity for commercial uses in Town is presented in Table 3 [9J-5.006(2)(c)(2), F.A.C.].

**Industrial** – This category on the *Existing Land Use Map* denotes all land used for warehousing, assembly and distribution of goods, light processing, heavy equipment, large durable goods, or other land uses requiring heavy truck traffic. The Town permits industrial uses on Light Industrial lots with conditions. Cell towers are also permitted in this land use under certain conditions. The intensity of industrial uses permitted in Town is featured in Table 3 [9J-5.006(2)(c)(2), F.A.C.].

**Public Use** - This category on the *Existing Land Use Map* denotes all land used for public service activities, water plants, electric sub-stations and telephone facilities with the exception of cell towers. On the *Existing Land Use Map*, this category includes and is used for utilities, government owned facilities, and institutional facilities such as educational facilities, day care facilities, churches or residential care facilities. The Town permits an intensity of 0.50 impervious surface ratio or 0.25 floor area ratio (see Table 3) [9J-5.006(2)(c)(2), F.A.C.].

**Recreation** - This category on the *Existing Land Use Map* denotes all land primarily used for outdoor recreational activities such as picnicking, jogging, cycling, outdoor courts, golf courses, and playing fields. These lands include both private and public recreational facilities. The Town permits an impervious surface ratio of 0.30 on recreational land uses (see Table 3) [9J-5.006(2)(c)(2), F.A.C.].

**Conservation** - This category on the *Existing Land Use Map* denotes all land used for wetlands, some uplands, public managed lands, floodplains, flood prone areas, and other areas in which valuable natural resources are found. No buildings are allowed on conservation lands in Town with the exception of boardwalks, docks, observation decks, or similar facilities allowed by the Town and all regulatory agencies. [9J-5.006(2)(c)(2), F.A.C.].

**Planned Unit Development (PUD)/Village Mixed Use** - In 1992, the Town approved a Planned Unit Development Mixed Use District Ordinance which permits a variety of residential structures and a diversity of building arrangements as well as complementary and compatible commercial uses and public or quasi-public facilities developed in accordance with an approved development plan. A large percentage of the lots in this category on the *Existing Land Use Map* are vacant. The permitted maximum density and intensity standards for planned unit development/mixed use are presented in Table 3. [9J-5.006(2)(c)(2), F.A.C.].

### Future Land Use

<table>
<thead>
<tr>
<th>Future Land Use</th>
<th>Maximum Density/Intensity</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Town Center Mixed Use (TCMU)</td>
<td>The Town Center Overlay District denotes where specific uses are permitted within the Town Center (see the Town’s Town Center Overlay Map). For areas designated Commercial Core, all new buildings must be 2 stories. A max. 2.0 FAR is permitted as long as parking requirements are achieved. (Commercial/office/services shall be located on the first floor and either commercial/office/services or residential on the second floor). For areas designated Office/Services or Residential, 40% max. impervious surface coverage. May live and/or work in these areas. For areas designated Residential, a max. of 4 units per acre. There are a total of 81.73 acres in the Town Center Overlay. About 23.3% of the Town Center Overlay is comprised of roads which are laid out in a grid system. About 52.5% of the Town Center Overlay area is designated for residential use. About 16% of the Town Center is designated for commercial/office/professional services use (with the possibility of residential on the second floor) and about 8.2% is designated as flex space, where either office, professional services, or residential uses – or a live/work combination of those uses is permitted. Open space within the Town Center will not be defined as it is for other areas within the Town. Rather, the Town has established maximum impervious surface coverage standards that may not be surpassed within the various uses in the Town Center. The areas designated as Commercial Core have a maximum impervious surface coverage of 100%. Areas designated office/professional services and/or residential shall have a maximum impervious surface coverage of 40% and areas designated as residential in the Town Center shall have a maximum impervious surface of 50%.In the commercial core of the Town Center, the Town anticipates a master stormwater system which will allow maximum coverage for buildings and surface parking.</td>
<td>The size of each individual business shall be regulated through the Land Development Regulations.</td>
</tr>
<tr>
<td>Future Land Use</td>
<td>Maximum Density/Intensity</td>
<td>Description</td>
</tr>
<tr>
<td>----------------</td>
<td>---------------------------</td>
<td>-------------</td>
</tr>
<tr>
<td>Village Mixed Use (VMU)</td>
<td>Must have a minimum of 25 acres for this land use. 4 dwelling units per acre; May be increased to 6 dwelling units per acre if the development includes 20% usable public open space (no wetlands); Residential areas shall comprise a minimum of 70% of the Net Land Area and a max. of 85% of the Net Land Area. Commercial/non-residential areas shall comprise a minimum of 15% of the Net Land Area and a maximum of 30% of the Net Land Area. This includes community facilities and schools. For developments with more than 100 acres, 5% of the non-res. land shall be dedicated for public/civic buildings. Commercial/non-residential may be 2 stories with 50% coverage as long as parking and other support facilities (stormwater) are met. Public recreational uses must occupy a minimum of 10% of the useable open space (no wetlands). A minimum of 25% open space is required.</td>
<td>A mix of uses is permitted and required in this category in order to promote sustainable development, including the provisions of reducing the dependability on the automobile, protecting more open land, and providing quality of life by allowing people to live, work, socialize, and recreate in close proximity. Elementary, middle, and high schools are also permitted in this category.</td>
</tr>
<tr>
<td>Neighborhood Commercial (NC)</td>
<td>0.50 floor area ratio; 70% max. impervious surface coverage</td>
<td>Commercial uses to support Town residents are permitted in this category. The size of each individual business shall be regulated through the Land Development Regulations. Elementary and middle schools are also permitted in this category.</td>
</tr>
<tr>
<td>Future Land Use</td>
<td>Maximum Density/Intensity</td>
<td>Description</td>
</tr>
<tr>
<td>---------------------</td>
<td>-----------------------------------------------------------------</td>
<td>------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Light Industrial (LI)</td>
<td>70% max. impervious surface coverage; 0.6 floor area ratio</td>

</tr>
<tr>
<td>Institutional (INST)</td>
<td>0.25 floor area ratio; 40% max. impervious surface coverage; 25% open space required</td>
<td>Educational facilities (public or private), religious facilities, day care (child and adult), government buildings (including fire and police), cemeteries, group homes, nursing homes, or community residential facilities, hospitals (general and emergency care).</td>
</tr>
<tr>
<td>Recreation (REC)</td>
<td>Max. 30% impervious surface coverage</td>
<td>Public or private recreational facilities.</td>
</tr>
<tr>
<td>Conservation (CON)</td>
<td>No buildings</td>
<td>Boardwalks, docks, observation decks, and similar facilities as allowed by the Town and all regulatory agencies.</td>
</tr>
<tr>
<td>Public/Utilities (PUB)</td>
<td>0.25 floor area ratio; max. impervious surface coverage of 50%</td>
<td>Government buildings and essential utilities, with cell towers being a special exception or conditional use.</td>
</tr>
</tbody>
</table>

Notes: Open Space: Open space is figured on the Gross Land Area. Up to 50% of the open space requirement may be met with wetlands. Open space may include landscaped buffers and stormwater facilities if they are designed to be a park-like setting with pedestrian amenities and free form ponds. Open space may be passive or active. Open space may include public recreational components of developments. The majority of the open space shall be permeable; however, up to 10% may be impervious (plazas, recreational facilities, etc.). Wet ponds are not counted as part of that 10%.

Densities shall be determined by the Net Land Area. The Net Land Area is figured by taking the Gross Land Area (total property less any lakes or water bodies), then subtracting from that any open space requirements, then subtracting from that any remaining unbuildable acreage (remaining wetlands).
2. Availability of Public Facilities and Services 9J-5.006 (2)(a), F.A.C.

The following data and analysis describes the availability of services and facilities to support development.

a. Sanitary Sewer

The Town understands that future development and redevelopment will require the provision of wastewater devices. Accordingly, Howey-in-the-Hills is in the process of entering an interlocal agreement with neighboring local governments to provide wastewater treatment to future developments in the Town. The Town will own the collection system within the Town’s Chapter 180 Utility Service Boundary and will contract with neighboring local governments to provide wholesale wastewater treatment to designated areas. The Town understands these will need to be established prior to approving future development or redevelopment. Howey-in-the-Hills has also established a wastewater impact fee to aid in the provision of this essential service.

Septic tanks will provide sanitary sewer service to development locating on a lot not less than 15,000 square feet (i.e., ¼ of an acre) if the soils have been determined adequate for the use of septic tanks. The Public Facilities Element identifies the minimum allowable size for septic tank system. Such systems must provide service consistent with the adopted level of service standards.

It is important to note that the Central Lake Community Development District currently provides wastewater treatment for Lake Hills School in Howey-in-the-Hills and will provide wastewater treatment for three new developments that are currently in development review. The Town will own and maintain the collection system (mains, lift stations, etc.) within the Town limits. This provision of services was established through an interlocal agreement which is further described in the Intergovernmental Coordination Element.

b. Potable Water

The Town currently owns, operates and maintains a central potable water treatment and distribution system. The Town’s potable water system provides water for both residential and non-residential purposes, including fire-fighting demands. The Town’s water system consists of two water plants located approximately one mile apart with a total of two active wells, one out-of-service well, one 50,000 gallon elevated storage tank and one 15,000 gallon hydropneumatic tank.

The Comprehensive Plan sets two different levels of service for potable water usage. The first LOS standard is 242.0 gallons per day per capita for the overall
customer usage and the second LOS standard is 150.8 gallons per day per resident for the residential customers.

On October 11, 2007 the St Johns River Water Management District (SJRWMD) issued Consumptive Use Permit (CUP) Number 2596 to the Town. The permit stated that maximum annual groundwater withdrawals from the Floridan Aquifer for the years 2007, 2008 and 2009 must not exceed:

- 2007 116.00 MG (0.318 mgd annual average);
- 2008 115.34 MG (0.316 mgd annual average); and
- 2009 128.48 MG (0.352 mgd annual average).

The permit duration was two years, with an expiration date of October 11, 2009. As this Comprehensive Plan was being prepared, the Town had applied to the SJRWMD for a renewal of its CUP, and based on the Town’s 2010 Water Supply Plan an increase of 0.003 mgd over the 2009 allocation will be requested as the allocation for 2020.

The Town’s Public Works Department is responsible for ensuring the minimum line pressure is maintained or exceeded. Digital electronic pressure recording devices monitor and record pressure readings. In addition to these measures, electronic pressure monitors that display the distribution pressure 24-hours-per-day are located at the water production facilities. The Town is currently meeting the 20 pounds per inch adopted level of service standard. The Town’s water system meets the demands within the Town’s boundaries. A detailed analysis of the Town’s potable water system is featured in the Public Facilities Element of this Comprehensive Plan.

c. **Stormwater Drainage**

Stormwater drainage within the Town is currently accommodated by both natural and man-made drainage features. Although culverts and drainage pipes comprise a large portion of the stormwater system, the Town does not know where the underground pipes lead and where their outfalls are located. This system was installed decades ago and no engineering studies or plans for the drainage system are available to determine the design capacity of the system. In addition to these features, there are private retention/detention areas which were constructed to provide fill for the Mission Inn Complex. These ponds provide on-site retention/detention and a certain amount of percolation of runoff to the aquifer.

Increased development and land coverage could increase the need to construct additional drainage facilities to protect Little Lake Harris from nutrient runoff. Drainage problems do exist with stormwater runoff believed to be discharging directly from State Road 19 into Little Lake Harris. The Town has received one
grant for a baffle box system to address this issue and plans to continue to seek funds to address the concern. There are no major flooding problems associated with stormwater runoff.

Level of service standards established in the Comprehensive Plan will continue to remain consistent with State statutes pertaining to the performance of the drainage system. The Town ensures the provision of adequate stormwater drainage systems through the development review process. Permits are also required from all applicable State, Federal, and local agencies with regard to stormwater. No development is approved or is allowed to begin construction until all such permits are received by the Town.

d. **Solid Waste**

Solid waste disposal is achieved through franchise agreements with one solid waste hauler. The Lake County Solid Waste Management Phase I facility, which accepted Class I and III waste, has been closed in accordance with an order from the Florida Department of Environmental Protection. The 80-acre landfill was operated since the 1970s without a bottom liner, which is now required for landfills accepting Class I wastes.

Phase II is made up of 3 cells in the northern part of the landfill: IIA, IIB, and IIC. Phase IIA has been designed to accommodate the ash residues from the resource recovery facility. Both IIB and IIC handle Class I waste. IIB is partially closed on the northeast side. Most of Lake County’s Class I waste goes to the Resource Recovery Facility in Okahumpka. There is a separate disposal area for construction and demolition debris on the northwest side of the property.

The Town will continue to dispose refuse at the County’s incinerator facility approximately 10 miles west of Town. The County will deposit waste ash in an ash monofill south of the incinerator near the Sumter County Line. The County’s designated hazardous waste transfer storage facility site is located 2 miles south of Town on Lone Pine Road (currently inactive as of 1989).

e. **Transportation**

Only two major roads provide access into Town: (1) County Road 48 and (2) State Road 19. County Road 48 provides a direct connection to the City of Leesburg and US 27. State Road 19 provides direct access to the Florida Turnpike, cities of Groveland and Tavares. All of the streets in Howey-in-the-Hills are paved.
The Town’s adopted level of service is D for minor arterials, collector roadways, and local roads. Based on the Town’s 2006 – 2007 Concurrency Report, there are no roads in Town that are over capacity.

The Town requires all development to provide adequate analysis of its impact on the roads in the Town to determine if the adopted LOS will be maintained.

The capacities or deficiencies for the Town’s road network is featured in the *Transportation Element* [9J-5.006(2)(a), F.A.C.].

**f. Recreation and Open Space**

Overall, there are about 174 acres (115 acres of golf courses, 54 acres of preserve in Sarah Maude Nature Preserve, and 5 acres of other recreational facilities) of recreational land available to meet the recreational needs of Howey-in-the-Hills’ residents and visitors.

The Town has adopted a level of service standard of 6.5 acres of park land for every 1,000 residents. There are 22.93 acres of parkland in Howey-in-the-Hills. The largest park in Town is the Sarah Maude Nature Preserve, which is about 54 acres of preserve and 17 acres of upland (the Town only includes the upland acres in the overall parkland acres) and the smallest Town park is Tangerine Point Park at 0.1 acres.

There is 4.5 acres designated as Recreation lands on the Town’s *Future Land Use Map*, almost all of this land is considered to be open spaces. The majority of these open spaces is adjacent to the lakes in Town and lack the space needed to accommodate development other than small recreational uses.

There are no major public open spaces or natural preservations within a half mile of the Town limits.

Recreational lands within the Town are depicted on the *Existing Land Use Map* and *Future Land Use Map* [9J-5.006(2)(a), F.A.C.].

**g. Public School Facilities**

As a requirement of Senate Bill 360 (SB 360) passed in 2005, an analysis of public school facilities is to be included in the *Comprehensive Plan*. A detailed inventory and analysis of the public school facilities is presented in the *Public School Facilities Element* of this Plan.
3. **Land Available for Development**

There are about 1,769 acres of vacant land (about 516 of those acres are Conservation land uses) in the Town (see the Town’s *Vacant Land Map*). The majority of this land does not have any major environmental constraints and is very suitable for development. Also, a majority of the vacant lands in the Town currently have a *Village Mixed Use Future Land Use* category.

4. **Soils and Topography**

Soils are an important aspect in land development. The physical and chemical properties of soils restrict the intensity of development through limitations on road construction, septic tank operation, and building placement.

There are a variety of soil types in Howey-in-the-Hills (see the Town’s *Soils Map*). The general descriptions of the soils in the Town are found below in Table 4 [9J-5.006(2)(b)(2), F.A.C.]. All upland soils are suitable for development and show little limitation for the use of septic tanks.

The Town lies on the Lake Wales Ridge, a physiographic high that has a high potential for aquifer recharge to the Floridan Aquifer. There is little topographic relief within the Town (90 feet). The upper limit is approximately 170 feet above sea level located south of E. Revels Road, west of Sunset Drive, and east of State Road 19. Around this area, there is a difference of about 80 feet in elevation (see the Town’s *Contour Map*). This topographic relief poses little, if any, limitations to development of vacant lands. See *Conservation Element* for a further discussion of soils and soil limitations.

### Natural Resource Management

In this section, natural resource protection which is applicable to Howey-in-the-Hills is discussed. The Town contains no Areas of Critical State Concern as established in Chapter 380.05, Florida Statutes. According to SJRWMD and the Army Corps of
Engineers, there are no dredge spoil disposal sites within the Town [9J-5.006(2)(b), F.A.C.].

**a. Surface Waters**

Lake Illinois and several unnamed lakes are within the Town limits. Additionally, the Town is adjacent to Little Lake Harris. The majority of these lakes are maintained by the County. There are no lakes in Town classified as “A Florida Outstanding Water”. The lakes are used for boating, swimming, fishing and other water activities.

**b. Floodplains**

Floodplains are valuable resources which provide a rich diversity of vegetation and wildlife. These areas are sources for groundwater recharge that filters through soils during high water levels. The 100-year floodplains are also subject to inundation during a 100-year storm, causing potential loss of life and property, disruption of services, and economic loss. These areas cannot tolerate continued development which, in effect, retards their ability to absorb water and restrict the flow of water from adjacent higher elevation areas.

The County’s Geographic Information Systems (GIS) database shows that there are 100-year floodplains in the Town (see the Town’s Floodplains Map). The FEMA flood zone designations in Howey-in-the-Hills are as follows:

- **Zone A** – Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are not performed for such areas; no depths or base flood elevations are shown within these zones.
- **Zone AE** - The base floodplain where base flood elevations are provided. AE Zones are now used on new format FIRMs instead of A1-A30 Zones.

Development within floodplains will continue to be closely scrutinized to ensure compliance with established regulations [9J-5.006(2)(b)(3) and 9J-5.006(2)(d)(2)(e), F.A.C.].

**c. Wetlands**

Wetlands by definition are transitional lands between terrestrial and aquatic systems where the water table is usually at or near the surface, or the land is covered with shallow waters. Wetland functions are interconnected with the hydrology of the area. This connection determines the presence, extent, movement, and quality of water in the wetland. It is estimated that wetlands
account for about 515 acres in the Town (see the Town’s Wetlands Map) [9J-5.006(2)(b)(4), F.A.C.].

d. Natural Groundwater Aquifer Recharge Areas

The Floridan aquifer is the principal source of drinking water for Lake County. Currently almost all of the ground water pumped in Lake County comes from the Upper Floridan but the potential for utilizing the lower Floridan aquifer is just beginning to be explored in Lake County.

Aquifer recharge is the process whereby rainfall percolates downward through the soil to reach the underlying aquifers. Recharge to the Floridan aquifer occurs in areas of the County where the elevation of the water table of the surficial aquifer is higher than the elevation of the potentiometric surface of the Floridan aquifer. In these areas, water moves from the surficial aquifer in a downward direction through the upper confining unit to the Floridan aquifer. The surficial aquifer system in the County is recharged by rainfall. Recharge is augmented locally by artificial recharge - wastewater or reuse water land application, rapid-infiltration basins, and septic systems.

Howey-in-the-Hills is located in a recharge area with a recharge rate of 1 to 10 inches per year and discharge rate of less than 1 inch per year [9J-5.006(2)(b)(4), F.A.C.].

e. Cone of Influence

Cone of influence is defined in Rule 9J-5, F.A.C., as an area around one or more major wellfields, the boundary of which is determined by the government agency having specific statutory authority to make such a determination based on groundwater travel or drawdown depth. The term waterwell is defined by Rule 9J-5, F.A.C., as a well excavated, drilled, dug, or driven for the supply of industrial, agricultural, or potable water for general public consumption.

Generally, the term cone of influence can be defined as the land area surrounding a well on which a present or future land use has the potential to negatively impact an aquifer as a result of the induced recharge from that well’s cone of depression. The purpose of delineating a cone of influence is to protect the current and future water supply.

The Town restricts development (except facilities related to the public water system) from occurring within a 150 foot radius of any existing or proposed public well (Primary Protection Zone). No septic tanks, sanitary sewer facilities, or solid waste or disposal facilities are permitted within a 200 foot radius of any existing or proposed public well (Secondary Protection Zone). The Town also
has established a 500 foot radius wellhead protection area within which manufacturing or light industrial uses are prohibited. The wellhead protection areas for the Town’s potable water supply wells are shown on the Existing and Future Land Use Maps [9J-5.006(4)(b)4, F.A.C.]

f. Air Quality

Air quality is another example of a natural resource that impacts the Town's and surrounding areas quality of life. The Florida Department of Environmental Protection and the United States Environmental Protection Agency monitor air quality data in Lake County. Lake County does not have an established program dedicated to monitoring air quality. Overall, Lake County's air quality can be considered good.

6. Historic Resources

The Florida Division of Historical Resources maintains and regularly updates the Florida Master Site File. The Florida Master Site File is a paper file archive and computer database of recorded historical cultural resources in Florida. Categories of resources recorded at the Site File include archaeological sites, historical structures, historical cemeteries, historical bridges and historic districts. The Site File also holds copies of survey reports and other manuscripts relevant to Florida history and prehistory. As of March 2010, there were 7 historic structures or sites in the Town that were added to the State’s Master Site File. The Howey House was listed in the National Register of Historic Places (see Table 5 and the Town’s National Register of Historic Resources Map) [9J-5.006(2)(b)(5), F.A.C.].

D. ANALYSIS

1. Economic Vitality

The Town is now and plans to continue primarily as a residential community with commercial support to serve the residents and visitors. The small downtown business district along Central Avenue from Lakeshore Boulevard to S. Mare Avenue, primarily serves the immediate convenience needs of the Town’s residents. The Town is currently in the process of developing a redevelopment plan for this area to include a master stormwater system and public parking areas. This redevelopment is planned during the short-range (2011-2015) and long-range (2025) planning period of this Plan. Various cities and towns in Lake County provide additional employment and needed services within reasonable commuting areas of the Town. As future development occurs in the Village Mixed Use areas, additional employment and service opportunities will be made available for the Town’s residents and others. This will provide for much improved sustainability for the Town over the planning period.

2. Nonconforming and Incompatible Uses

Land use conflicts arise when uses are introduced in dissimilar areas without proper buffering. The Future Land Use Map and the Howey-in-the-Hills Land Development

Regulations set forth the appropriate locations for land uses in the Town in order to eliminate existing land use conflicts. The Town’s Land Development Regulations addresses incompatibilities through control of nonconforming uses [9J-5.006(2)(d)(2), F.A.C.].

3. Availability of Facilities and Services

This section provides an overview of the availability of public facilities and services in Howey-in-the-Hills during the planning period.

As previously mentioned, the Town of Howey-in-the-Hills currently has a very limited central wastewater system. The Wastewater Treatment Facility (WWTF) is owned by the Central Lake Community Development District with the Town owning and maintaining the collection system up to the CDD facility. In 2006, through a wastewater impact fee study performed in anticipation of possible creation of a Town-owned wastewater collection and treatment system, the Town established a wastewater Level of Service value of 120 gallons per person per day [9J-5.006(2)(a), F.A.C.].

As previously mentioned, the Town’s potable water system provides water for both residential and non-residential purposes, including fire-fighting demands. The system has enough capacity to support the population demand during the planning period of this Comprehensive Plan (2025). However, there are significant reliability and redundancy issues that require upgrades to existing facilities and construction of additional facilities. The Town has identified several projects required to serve water customers within its jurisdiction (see the Town’s 5-year Capital Improvement’s Program (fiscal years 2009-2013) [9J-5.006(2)(a), F.A.C.].

The Town’s solid waste level of service standard for solid waste is 6 pounds per person per day. There is sufficient capacity in the County’s landfill to support the population demand during the short-range (2011-2015) and long-range (2025) planning period [9J-5.006(2)(a), F.A.C.].

The Town shall continue to require development to provide for the 100 year, 24-hour rainfall event and provide retention for water quality consistent with new and innovative techniques. The Town shall also continue to require that all new development provide evidence to show that LOS ratings in stormwater conveyances serving the new development will not be degraded to an LOS lower than currently exists as a result of the new development’s construction and stormwater runoff contribution [9J-5.006(2)(a), F.A.C.].

There are more than adequate recreational facilities and open spaces readily available and accessible to the residents and guests of Howey-in-the-Hills. The Town shall continue to coordinate with the County on establishing measures to enhance the recreation and open space opportunities in and around Town. The Town will also continue to solicit grants
from public and private agencies, and collect park impact fees to fund future parks and facilities. [9J-5.006(2)(a), F.A.C.].

There are no public school facilities planned in the Town during the short-range (2011-2015) and long-range (2025) planning period.

4. **Groundwater Recharge**

As previously mentioned, Howey-in-the-Hills is located in a recharge area with a recharge rate of 1 to 10 inches per year and discharge rate of less than 1 inch per year. There are no known groundwater recharge problems in Howey-in-the-Hills. The Town shall continue to protect the quality of groundwater recharge through enforcing the Town’s Land Development Regulations and the guidelines established in this Comprehensive Plan. The quality of groundwater recharge shall also be protected by ensuring that all stormwater conveyances serving new development does not degrade the level of service lower than currently exists as a result of the new development’s construction and stormwater runoff contribution [9J-5.006(2)(a), F.A.C.].

5. **Analysis of Existing Vacant Lands**

As previously mentioned, there are 1,769 acres of vacant land (516 acres of this land is Conservation land use) in Town. About 51% (909 acres) of the vacant lands is in the Village Mixed Use Future Land Use category and 19% (335 acres) is designated for Residential uses (see the Town’s Vacant Lands Map). The soils on these vacant lands are overall suitable for development. The elevation on these vacant lands range from 75 feet mean sea level (MSL) to 170 feet MSL. There are no known sinkholes located on these vacant lands. There are also no known environmentally sensitive lands or significant natural resources located on these vacant lands that will prevent any development [9J-5.006(2)(b), F.A.C.].

6. **Analysis of Land Needed to Accommodate Projected Population**

As a requirement of Rule 9J-5.006(2)(c), the Town has identified the land needed to support the population demand in 2025 (see Table 6). Based on the analysis featured in Table 6, the Town will need an additional 340 acres in order to support the 2025 population of 1,594. It is important to note that the Town has about 1,244 acres of vacant land that can be used for mixed use or residential uses. As such, the Town has an adequate amount of vacant that’s needed to support the population demand during the short-range (2011-2015) and long-range (2025) planning period. As the vacant Village Mixed Use parcels develop, the Town will ensure that additional recreational facilities are implemented during the development review process.

**During the update of this Comprehensive Plan, there were no lands in Town with a RL-Rural Residential Future Land use category.
*** Streets/Rows is not a land use category on the Future Land Use Map. It was included to illustrate the total acres in Town. The numbers presented in Table 6 do not indicate an actual surplus or deficit of streets/rows in Town; they are for planning purposes only. See the Transportation Element for a detailed analysis of the transportation needs in Town.
All vacant lands other than Conservation land uses were excluded from the Existing Acreage. These lands were included in the acreage from the 2025 Future Land Use Map column.

Notes: FAR = Floor Area Ratio, ISR = Impervious Surface Ratio, and DU = Dwelling Units.

*Excludes the Town Center Mixed-use Overlay District (underlying land use varies depending on designated areas and specific uses).
7. **Analysis of Need for Redevelopment**

The Town Center Overlay District is in need of redevelopment. The Town is currently working on a Stormwater Master Plan for this area as well as an interlocal agreement to obtain wastewater services for this area. Howey-in-the-Hills will promote a live-work environment as well as shopping and restaurants to serve the local area.

8. **Analysis of Flood Prone Areas**

The Town shall continue to ensure that development within floodplains will be closely scrutinized to ensure compliance with established Land Development Regulations. The majority of vacant lots in Town are very suitable for building [9J-5.006(2)(e), F.A.C.].

9. **An analysis of Land Use Problems and Potential Use Problems**

No major current or potential land use problems are seen within the Town.

10. **Urban Sprawl**

The Town does not and will continue not to promote the approval of development that will contribute to “urban sprawl.” An analysis corresponding to measures the Town implements to discourage a proliferation of urban sprawl is featured in this section. Rule 9J-5.006 identifies the primary urban sprawl indicators as below.

1. Promotes, allows or designates for development substantial areas of the jurisdiction to develop as low-intensity, low-density, or single-use development or uses in excess of demonstrated need.

The Town has adopted a Planned Unit Development ordinance and Village Mixed Use and Town Center Mixed Use land uses. There has not been any significant development of low intensity single family subdivisions. The Town’s Concurrency Management System, subdivision regulations, and zoning regulations discourages this type of development.

2. Promotes, allows or designates significant amounts of urban development to occur in rural areas at substantial distances from existing urban areas while leaping over undeveloped lands which are available and suitable for development.

All new development must prove that it will be served by adequate public facilities prior to the issuance of a development order. The new development must also demonstrate that it will not degrade the level of service beyond the adopted standard.
3. Promotes, allows or designates urban development in radial, strip, isolated or ribbon patterns generally emanating from existing urban developments.

The Town’s Village Mixed Use and Town Center Overlay Mixed Use categories preclude strip commercial-type development and isolated single uses.

4. As a result of premature or poorly planned conversion of rural land to other uses, fails adequately to protect and conserve natural resources, such as wetlands, floodplains, native vegetation, environmentally sensitive areas, natural groundwater aquifer recharge areas, lakes, rivers, shorelines, beaches, bays, estuarine systems, and other significant natural systems.

The Town protects and conserves all natural resources by enforcing the requirements of this Comprehensive Plan and the Town’s Land Development Regulations. The Town delineates wetlands and other environmentally sensitive lands as Conservation on the Town’s Existing and Future Land Use Maps. No buildings are permitted on Conservation lots in Town with the exception of boardwalks, docks, observation decks, and similar facilities as allowed by the Town and all regulatory agencies.

5. Fails adequately to protect adjacent agricultural areas and activities, including silviculture, and including active agricultural and silvicultural activities as well as passive agricultural activities and dormant, unique and prime farmlands and soils.

The Town has adopted a Rural Lifestyle land use category on the Future Land Use Map. This land use is primarily for single-family detached homes with allowable agricultural practices. There is a minimum of 2 acres required for this land use. There is a maximum density of 1 dwelling unit per 2 acres, 0.15 floor area ratio, 20% maximum impervious surface coverage, and 50% open space requirement on the Rural Residential lots in Town. The Town feels that the adopted standard is adequate to protect these agricultural areas in Town to serve as a buffer for nearby rural areas.

6. Fails to maximize use of existing public facilities and services.

The Town annually updates and adopts a Concurrency Management System Report to ensure that existing public facilities and services have enough capacity to support the population demand. All deficiencies are identified along with capital plans to address those deficiencies. Any deficiencies are incorporated in the Capital Improvements Element.
7. Fails to maximize use of future public facilities and services.

The Town annually updates and adopts a *Concurrency Management System Report* to ensure that future public facilities and services are adequately signed to address future needs.

8. Allows for land use patterns or timing which disproportionately increase the cost in time, money and energy, of providing and maintaining facilities and services, including roads, potable water, sanitary sewer, stormwater management, law enforcement, education, health care, fire and emergency response, and general government.

The Town has concurrency requirements for potable water, sewer, solid waste, drainage, parks and recreation, roads, and public schools.

9. Fails to provide a clear separation between rural and urban uses.

The Town feels that the adopted open space, and minimum development intensity and density standards are sufficient to ensure a clear separation between rural and urban uses.

10. Discourages or inhibits infill development or the redevelopment of existing neighborhoods and communities.

The Town promotes infill development or redevelopment of existing neighborhoods and communities and has created a Town Center Overlay to address infill and redevelopment in the historic Town Center.

11. Fails to encourage an attractive and functional mix of uses.

The Town has adopted a Planned Unit Development Ordinance which would permit an attractive and functional mix of uses in appropriate areas of the Town. There are about 855 acres of land designated as Village Mixed Use on the Town’s *Future Land Use Map* and majority of this land is vacant.

12. Results in poor accessibility among linked or related land uses.

Solutions to better manage traffic within the historic downtown area and to discourage additional traffic have been implemented. Uses have also been linked with bicycle paths and sidewalks. The Town requires new subdivisions or developments to address circulation, access control, off-street parking and landscaping of median strips and rights-of-way.
13. Results in the loss of significant amounts of functional open space.

The Town requires that levels of service be met for park land and open space. Each new development will include open space and recreational components.

The Town shall continue to discourage the approval of any development or redevelopment projects that will promote urban sprawl.

In accordance with Rule 9J-5.006(2)(i), F.A.C., the Town has identified strategies for producing energy efficient land use patterns, increasing energy conservation, and reducing greenhouse gas emissions. This section provides an overview of the energy related strategies implemented by the Town.

a. Producing Energy Efficient Land Use Patterns

The Town has adopted the Village Mixed Use and Town Center Mixed Use land uses as a tool to produce energy efficient land use patterns in Howey-in-the-Hills. The Town will ensure that developments within these mixed-use areas are compact, walkable neighborhoods.

The Town has also established a “build-out” area (the Town’s Utility Service Area) to determine the maximum extent of where urban development will be approved by Town Council. During the preparation of the Future Land Use Map, the Town reviewed all land uses to ensure that the higher gross density and intensity standards were appropriately established in all areas planned for urban development within the “build-out” area.

The Town’s minimum density and intensity standards apply to all areas planned for urban development and redevelopment. These standards and the buffering requirements established in the Land Development Regulations ensure that the land uses in Howey-in-the-Hills will remain compatible and consistent with the surrounding land uses.

b. Increasing Energy Conservation

The Town is in the process of establishing an Energy Management Plan to increase energy conservation (see Policy 1.17.3 of this Element). The Energy Management Plan will be used as a tool to minimize electric, fuel and water resources in Town buildings, fleet vehicles and on public properties.
The Town promotes “green” development in both private and municipally-supported housing. Green development specifically relates to the environmental implications of development. Green building integrates the built environment with natural systems, using site orientation, local sources, sustainable material selection and window placement to reduce energy demand and greenhouse gas emissions. The Town is in the process of amending the Land Development Regulations to establish green building practices and sustainability development guidelines.

The Town requires energy-efficient and water saving measures to be implemented in all new construction and redevelopment projects.

c. Reducing Greenhouse Gas Emissions

The Village Mixed Use and Town Center Mixed Use land uses will serve as a tool to reduce vehicle miles traveled in Town, which will reduce the greenhouse gas emissions. Residents and guests of Howey-in-the-Hills can easily access the historical downtown or Little Lake Harris area by walking or biking. The Town is actively involved with the Lake-Sumter MPO in regards to expanding the pedestrian and bicycle facilities in Town. The Town will continue to promote mixed-use developments, bicycling, and walking as a tool to reduce the greenhouse gas emissions in the Howey-in-the-Hills area.

The Town is amending its Land Development Regulations to ensure that the removal of regulatory barriers and establishment of incentives to promote energy efficiency and conservation is implemented in Howey-in-the-Hills.
E. FUTURE LAND USE GOALS, OBJECTIVES, AND POLICIES

Upon the effective date of the ordinance adopting this Comprehensive Plan, all rules, regulations, criteria, and principles set forth in the Plan become effective. Where a policy refers to the Land Development Regulations, the intent of the policy and its contents remain effective with the Plan adoption date. Regulations established by State or Federal statutes or administrative codes referenced in objectives or policies shall pertain to the most recent adopted regulation or code as may be amended by said parties from time to time without immediate notice to the Town.

GOAL 1: Retention of the quaint distinctive residential character of the Town by promotion of high quality residential development together with an appropriate level of supporting service and retail opportunities and live-work environments as well as preserving the natural features of the area and minimizing threats to the citizens caused by hazards, nuisances, incompatible land uses or environmental degradation while providing a sense of place and history.

OBJECTIVE 1.1: Identifying Land Use Patterns and Permitted Densities and Intensities. To identify the appropriate land use patterns, residential densities, and non-residential intensities of land use permitted in Howey-in-the-Hills.

POLICY 1.1.1: Land Use Designations. The Town shall establish, adopt and implement density and intensity standards for all future land uses, as applicable, and as indicated on the Future Land Use Map and the adopted Town Zoning Map.[9J-5.006(3)(c)(7), F.A.C.]

Density and intensity standards for land uses in Howey-in-the-Hills are featured below:

<table>
<thead>
<tr>
<th>Land Use</th>
<th>Maximum Residential Density</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential:</td>
<td></td>
</tr>
<tr>
<td>Low Density Residential (LDR)</td>
<td>Up to 2.0 dwelling units per acre. Maximum building height is 2-1/2 stories and no higher than 30 feet.</td>
</tr>
<tr>
<td>Medium Density Residential (MDR)</td>
<td>Up to 4.0 dwelling units per acre. A 25% minimum open space is required. Developments with 100 units or more shall be required to have a public recreation component. Developments with more than 300 proposed units must use the Village Mixed Use designation. May include support community facilities and elementary schools. Maximum building height is 2-1/2 stories and no higher than 30 feet.</td>
</tr>
<tr>
<td>Rural Lifestyle (RL)</td>
<td>Up to 1.0 per 2 acres. Must have a minimum of 2 acres for this land use. A 50% minimum open space is required. All buildings shall not exceed a 0.15 floor area ratio. The maximum impervious surface coverage is 0.20. Maximum building height is 2-1/2 stories and no higher than 30 feet.</td>
</tr>
<tr>
<td>Land Use</td>
<td>Maximum Land Intensity</td>
</tr>
<tr>
<td>-----------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Neighborhood Commercial (NC)</td>
<td>The maximum floor area ratio is 0.50. The maximum impervious surface coverage is 0.70. The maximum building height is 35 feet and limited to two-stories. The maximum building size is 5,000 sq. ft.; unless a special exception is granted to the developer by the Town Council. Elementary and middle schools are also permitted in this category.</td>
</tr>
<tr>
<td>Light Industrial (LI)</td>
<td>The maximum impervious surface is 0.70. The maximum floor area ratio is 0.60. High schools are permitted in this category.</td>
</tr>
<tr>
<td>Institutional (INST)</td>
<td>The maximum floor area ratio is 0.25. The maximum impervious surface coverage is 0.40. A 25% minimum open space is required. Maximum building height is 2-1/2 stories and no higher than 30 feet.</td>
</tr>
<tr>
<td>Recreation (REC)</td>
<td>Maximum impervious surface coverage is 0.30. Restricted to passive or active recreational facilities as established in the Recreation and Open Space Element or by the Town Council.</td>
</tr>
<tr>
<td>Conservation (CON)</td>
<td>No buildings. Restricted to boardwalks, docks, observation decks, and similar facilities as allowed by the Town and all regulatory agencies.</td>
</tr>
<tr>
<td>Public/Utility (PUB)</td>
<td>The maximum floor area ratio is 0.25. The maximum impervious surface coverage is 0.50. For utilities, the maximum building height is 1 story or no higher than 20 feet for building; 2 story and 35 feet for other facilities.</td>
</tr>
<tr>
<td>Village Mixed Use (VMU)</td>
<td>Minimum of 25 acres to apply for this land use. Maximum density of 4 dwelling units per acre; which may be increased to 6 dwelling units per acre if the development includes 20% usable public open space (no wetlands). Residential areas shall comprise a minimum of 70% of the net land area and a maximum of 85% of the net land area. Commercial/non-residential areas shall comprise a minimum of 15% of the net land area and a maximum of 30% of the net land area. This includes community facilities and schools. For developments with more than 100 acres, 5% of the non-residential land shall be dedicated for public/civic buildings. Commercial/non-residential may be 2 stories with 50% coverage as long as parking and other support facilities (stormwater) are met. The maximum building height is 35 feet. Public recreational uses must occupy a minimum of 10% of the useable open space (no wetlands). A minimum of 25% open space is required. The maximum building size is 30,000 sq. ft.; unless a special exception is granted to the developer by the Town Council.</td>
</tr>
</tbody>
</table>
The Town Center Overlay Map denotes where specific uses are permitted within the Town Center (see the Town’s Town Center Overlay Map). For areas designated Commercial Core, all new buildings must be 2 stories. The maximum building height is 35 feet. In order to maintain the historic character of the downtown area, the Land Development Regulations will cap the maximum size of any one business in the Town Center Overlay at 5,000 square feet. A maximum 2.0 floor area ratio is permitted as long as parking requirements are achieved. Commercial/office/services shall be located on the first floor and either commercial/office/services or residential on the second floor.

For areas designated Office/Services or Residential, the maximum impervious surface coverage is 0.40. May live and/or work in these areas.

For areas designated Residential, the maximum density is 4 units per acre.

There are a total of 81.73 acres in the Town Center Overlay. About 23.3% of the Town Center Overlay is comprised of roads which are laid out in a grid system. About 52.5% of the Town Center Overlay area is designated for residential use. About 16% of the Town Center is designated for commercial/office/professional services use (with the possibility of residential on the second floor) and about 8.2% is designated as flex space, where either office, professional services, or residential uses – or a live/work combination of those uses is permitted.

Open space within the Town Center will not be defined as it is for other areas within the Town. Rather, the Town has established maximum impervious surface coverage standards that may not be surpassed within the various uses in the Town Center. The areas designated as Commercial Core have a maximum impervious surface coverage of 100%. Areas designated office/professional services and/or residential shall have a maximum impervious surface coverage of 40% and areas designated as residential in the Town Center shall have a maximum impervious surface of 50%. In the commercial core of the Town Center, the Town anticipates a master stormwater system which will allow maximum coverage for buildings and surface parking.

**POLICY 1.1.2: Land Use Categories.** The land use categories, as depicted on the Town’s 2025 Future Land Use Map (FLUM) shall permit the following uses and activities.

**Conservation** - Conservation lands shall include those lands so designated on the FLUM. These areas are generally composed of open land, water, marsh and wetlands and environmentally sensitive areas. Conservation lands may be either publicly or privately owned. It is intended that the natural and open character of these areas be retained and that adverse impacts, which may
result from development, shall be prohibited or minimized. Adverse impacts shall be presumed to result from activities, which contaminate or degrade wetlands and environmentally sensitive areas, or natural functions and systems associated with such areas. Permitted uses within the Conservation category shall be limited to the following and shall be further controlled by the Land Development Regulations.

- Activities intended for the conservation, re-establishment and re-nourishment, or protection of natural resources.
- Recreation uses and facilities that are customarily described as passive in nature including, but not limited to, fishing, hiking and biking, canoeing, kayaking, and the use of other similar small, quiet low-speed watercraft.
- Very low intensity outdoor or water-dependent recreational related uses (excluding commercial marinas) that are determined not to be in conflict with the intent of the Conservation category, subject to applicable Federal, State and local policies and permitting requirements.

**Neighborhood Commercial** - The Neighborhood Commercial land use category is intended to provide appropriate locations for neighborhood and community businesses providing services and retail sales for the Town and the nearby communities. Permitted uses within the Neighborhood Commercial category shall be limited to the following uses; unless a special exception is granted to applicant by the Town Council.

- **General Commercial.** These areas shall include those businesses that provide retail goods and services, which serve the routine and daily needs of residents, including banks and professional services, grocery and convenience stores, retail shops, and restaurants. Public and private elementary and middle schools are also allowed.
- **Limited Commercial.** These areas shall include low intensity office, service and retail businesses that are compatible when located in close proximity to neighborhoods. These uses are intended primarily to serve the needs of the closely surrounding neighborhood.
- **Professional and Office.** These areas shall be limited to small neighborhood scale businesses and professional offices that are compatible with, and have no measurable or noticeable adverse impacts, upon surrounding residential uses. Such uses include offices for doctors and dentists (but not clinics or hospitals), accountants, architects, attorneys, engineers, land surveyors, real estate brokers, financial planners, insurance and real estate agents and the like.

**Light Industrial** – The Light Industrial category shall be limited to light manufacturing and production, storage, warehousing and distribution uses as further controlled by the Land Development Regulations. Light industrial uses may have outdoor storage and business related activity, but such uses shall not include processes that create negative effects to surrounding properties due to noise, heat, fumes, debris, chemicals or hazardous materials. High schools are permitted in this category.

**Rural Lifestyle** – The Rural Lifestyle category shall be primarily limited to single-family detached homes with agricultural uses. Limited commercial activities are permitted such as bed and breakfast establishments, horse back riding facilities, and farm stands for fruits and vegetables grown on that location.

**Low Density Residential** – The Low Density Residential category shall be primarily limited to single-family detached homes. Residential uses in this category shall be permitted in those areas so designated in accordance with the applicable permitted density and as further controlled by the Land Development Regulations and the Florida Building Code.

**Medium Density Residential** - The Medium Density Residential category shall be primarily limited to single-family detached homes, townhomes, or similar type of uses. Support community facilities and elementary schools are also permitted in this category. Residential uses in this category shall be permitted in those areas so designated in accordance with the applicable permitted density and as further controlled by the Land Development Regulations and the Florida Building Code.

**Institutional** – The Institutional category shall be primarily limited to schools, religious facilities, day care facilities (child and adult),
government buildings, cemeteries, or similar uses as identified by the Town Council.

**Recreation** – These areas generally include public parks or private parks that are open and available to the public. Note: Some park and open space lands may be more appropriately designated as Conservation, such as lands with wetlands or other environmentally sensitive areas. Permitted uses shall include active and passive recreation activities including bikeways and pedestrian trails, or other similar facilities as identified by the Town Council.

**Public/Utility** - These areas include uses such as government facilities and essential utilities, including police, fire and Town Hall buildings and wastewater facilities.

**Town Center Mixed Use** – Primarily intended for mixed-use development in the historical downtown area. The historical downtown area is an economic, cultural, social, historic and architectural anchor of the Town. In order to sustain these qualities, new development and redevelopment within the Town Center Mixed Use District shall be reflective of the architectural styles and fabric of the area. Consistency and compatibility with the existing built environment shall be considered in the review and issuance of development permits within the Town Center Mixed Use District. In order to preserve the quaint character of downtown Howey-in-the-Hills, size limitations will also be placed on individual businesses. Redevelopment will focus on orienting buildings and roadways to a pedestrian scale.

**Village Mixed Use** – Primarily intended to create sustainability and maintain the unique charm of the Town, including the provisions of reducing the dependability on the automobile, protecting more open land, and providing quality of life by allowing people to live, work, socialize, and recreate in close proximity. Elementary, middle, and high schools are also permitted in this category.

**POLICY 1.1.3:** **Consideration of Community Facilities.** Necessary community facilities shall be permitted within any future land use designation except Conservation if such activity satisfies established criteria of the Comprehensive Plan and the Town’s Code of Ordinances.
POLICY 1.1.4: Interpretation of Open Space and Density Designations. Open space is figured on the Gross Land Area. Up to 50% of the open space requirement may be met with wetlands. Open space may include landscaped buffers and stormwater facilities if they are designed to be a park-like setting with pedestrian amenities and free form ponds. Open space may be passive or active. Open space may include public recreational components of developments. The majority of the open space shall be permeable; however, up to 10% may be impervious (plazas, recreational facilities, etc.). Wet ponds are not counted as part of that 10%.

Densities would be determined by the Net Land Area. The Net Land Area is figured by taking the Gross Land Area (total property less any lakes or water bodies), then subtracting from that any open space requirements, then subtracting from that any remaining unbuildable acreage (remaining wetlands).

OBJECTIVE 1.2: Residential Quality and Neighborhood Cohesiveness. Designate and promote sufficient areas for quality residential development and neighborhood cohesiveness, and require the availability of adequate facilities to support demands necessitated by existing and future housing development and associated populations. [9J-5.006(3)(b)1, F.A.C.]

POLICY 1.2.1: Adequate Residential Land Area. The Town shall ensure that adequate residential land uses needed to support the population during the short-range (2011-2015) and long-range (2025) planning period shall be designated on the Future Land Use Map. The residential land uses shall continue to reflect a pattern that promotes neighborhood cohesiveness and identity. All residential uses shall be subject to the requirements established in the Town’s Land Development Regulations.

POLICY 1.2.2: Open Space Requirements. The Town shall continue to ensure that residential development is consistent with the open space requirements established below [9J-5.006(3)(c)4, F.A.C.]:

<table>
<thead>
<tr>
<th>Location</th>
<th>Minimum open space requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rural Lifestyle</td>
<td>50%</td>
</tr>
<tr>
<td>Low Density Residential</td>
<td>2 dwelling units per acre</td>

</tr>
<tr>
<td>Public/Utilities</td>
<td>0.25 FAR; max. impervious surface coverage of 50%</td>
</tr>
</tbody>
</table>

**Open Space:** Open space is figured on the Gross Land Area. No greater than 50% of the open space requirement may be met with wetlands. Open space may include landscaped buffers and stormwater facilities if they are designed to be a park-like setting with pedestrian amenities and free form ponds. Open space may be passive or active. Open space may include public recreational components of developments. The majority of the open space shall be permeable; however, up to 10% may be impervious (plazas, recreational facilities, etc.). Wet ponds are not counted as part of that 10%.

**POLICY 1.2.3:**

**Encroachment of Incompatible Non-residential Development.** Residential areas delineated on the Future Land Use Map shall be protected from the encroachment of incompatible non-residential development. Community facilities and services which best serve the health, safety, and welfare of citizens when located in residential areas, shall be permitted uses therein so long as the activity complies with criteria established in this Plan and those in the Town’s Code of Ordinances. [9J-5.006(3)(c)2, F.A.C.]
POLICY 1.2.4: **Residential Screening Techniques.** The Town shall require new commercial, light industrial, and manufacturing development to install landscaping, visually obstructive fencing or man-made berms, or other appropriate screening techniques obstructing view of the commercial, light industrial, or manufacturing site from areas designated for low or medium density residential if the proposed commercial, light industrial, or manufacturing building is incompatible with the residential area.

POLICY 1.2.5: **Access to and Circulation within Residential Areas.** Transportation systems within designated residential areas delineated on the Future Land Use Map shall be designed to accommodate traffic conditions that maintain public safety, encourage alternative modes of transportation, and limit nuisances. Access to residential areas shall comply with policies established within the Transportation Element.

POLICY 1.2.6: **Transition of Residential Densities.** The Town shall continue to orient the transition of residential densities on the Future Land Use Map toward higher densities along major transportation corridors and areas adjacent to commercial or other intensive land uses, while lower residential densities shall be directed towards areas further from the Town center (i.e., the central commercial district) and in areas adjacent to agricultural lands. [9J-5.006(3)(c)7, F.A.C.]

POLICY 1.2.7: **Compatibility of Residential Densities and Public Facilities.** Residential densities shall be compatible with available public facilities and their capacity to serve development. Residential areas designated on the Future Land Use Map shall be allocated according to a pattern that promotes efficiency in the provision of public facilities and services, and furthers the conservation of natural resources. Public facilities shall be required to be in place concurrent within the impacts of development. [9J-5.006(3)(c)2, F.A.C.]

POLICY 1.2.8: **Concurrency Management System Criteria.** All public facilities and services must be in place consistent with the criteria established within the Town’s Concurrency Management System. Development applications for new residential development shall not be approved unless water, sewer, drainage, park, transportation, solid waste, and public school capacities are available consistent with level of service standards and according
POLICY 1.2.9: Residential Density and the Future Land Use Map. The Town shall ensure that residential density on the Future Land Map is based on the following considerations:

- past and anticipated future population and housing trends and characteristics;
- provision and maintenance of quality residential neighborhoods and preservation of cohesive neighborhoods;
- protection of environmentally sensitive lands; and
- transition of density between low, medium and high residential districts. [9J-5.006(3)(c)7, F.A.C.]

POLICY 1.2.10: Group Home and Foster Care Facilities. The Town shall continue to allow the location of group homes and foster care facilities in residential areas. These facilities shall serve as alternatives to institutionalization.

OBJECTIVE 1.3: Conservation of Environmentally Sensitive Lands, Other Natural Resources, Historically Significant Sites. Manage and control existing and future land uses located within or adjacent to environmentally sensitive lands, open space, other significant natural resources, and historically significant sites. [9J-5.006(3)(b)4, F.A.C.]

POLICY 1.3.1: Limiting Development in Wetland Areas. The Town shall limit development within all wetland areas to land uses supporting conservation facilities and water-related passive recreation activities, as defined in the Recreation and Open Space Element. Wetlands shall be identified on the Future Land Use Map Series as Conservation lands. No development shall be permitted in wetlands except for conservation or passive recreation uses as defined within policies cited herein.

POLICY 1.3.2: Wetlands and Natural Buffer Zones. Wetlands shall be protected from impacts generated by adjacent land uses through natural buffer zones.

1. No development of disturbance of area is permitted within 25 feet of a designated wetland area. These areas shall be marked with appropriate signage as conservation areas.
2. No building or impervious surface area (with the exception of wet retention areas) is permitted within 50 feet of a designated wetland area.

POLICY 1.3.3: **Protection of Floodplains.** Development within the 100 Year Floodplain shall provide necessary mitigation to maintain the natural stormwater flow regime. The 100 Year Floodplain Zone shall be delineated within the *Future Land Use Map* series. The boundary of the 100 Year Floodplain Zone shall be determined by the most recent Flood Insurance Maps prepared by the Federal Emergency Management Agency. [9J-5.006(3)(c)1, F.A.C.]

POLICY 1.3.4: **Floodplain Mitigation.** All development within the 100 Year Floodplain shall adhere to the following [9J-5.006(3)(c)1, F.A.C.]:

a. **Prohibited Land Uses and Activities.** Storing or processing materials that would, in the event of a 100 Year Storm, be buoyant, flammable, explosive, or potentially injurious to human, animal or plant life is prohibited. Material or equipment immune to substantial damage by flooding may be stored if securely anchored to prevent flotation or if readily removable from the area upon receipt of a flood warning. Manufacturing and light industrial land uses shall be prohibited from encroaching into the 100 Year Floodplain Zone.

b. **Minimum Floor Height Elevation.** All new construction and substantial improvements of existing construction occurring within a 100 Year Flood Zone must have the first floor elevation for all enclosed areas at eighteen inches above the 100 year flood elevation.

c. **Construction Materials and Methods.** All new construction and substantial improvements of existing construction shall be constructed with material and utility equipment resistant to flood damage, and using methods and practices that will minimize flood damage and prevent the pollution of surface waters during a 100 year flood event.

d. **Service Facilities and Utilities.** Electrical heating, ventilation, plumbing, air conditioning, and other service facilities shall be designed or located to prevent water from entering or accumulating within the components during a base flood. All new and replacement water supply and
sanitary sewage systems shall be designed to minimize or eliminate both infiltration of flood water into the systems and discharges from the systems into flood waters.

e. **Residential Subdivision Plans and Design.** Plans for subdivisions shall minimize potential flood damage by locating recreation and conservation uses, if included in the plans, to areas within the Flood Zone, reserving as much land as possible outside the flood zone for other land uses. Also, 100 Year Flood Zones shall be identified on all final development plans submitted to the Town.

f. **Stormwater Facilities.** The Town shall require development to have drainage facilities in place and functioning concurrent with the impacts of development, as stipulated by deadlines established within its Concurrency Management System. Such drainage facilities shall be designed to comply with the Town’s established level of service standard.

**POLICY 1.3.5: Aquifer Recharge.** The Town rests on an area possessing high aquifer recharge potential. To maintain the natural rate of percolation within aquifer recharge areas, the Town shall enforce the following:

a. **Impervious Surface Ratio and Open Space.** Enforce the impervious surface ratios and open space standards established in this Comprehensive Plan.

b. **Manufacturing or Light Industrial Uses and Recharge Areas.** Ensure that the Future Land Use Element does not allocate any manufacturing or light industrial land use activities adjacent to lake front areas or within high recharge groundwater aquifer areas that generate pollutants that may adversely impact the quality of surface and ground waters. The guidelines established in the Town’s Land Development Regulations regarding manufacturing uses permitted within commercial districts and light industrial uses shall serve as a guide to monitor the type and intensity of such uses in the Town.

c. **Permeable Parking Lots.** Promote the application of permeable parking lot surfaces for commercial developments proposed within high recharge areas.
d. **Land Use Activities and Densities.** Promote land use activities and development densities which are compatible to high recharge potential percolation rates.

**POLICY 1.3.6: Lake Shore Protection.** To protect the lake front areas from the encroachment of development, a shoreline protection zone shall be delineated. There shall be no disturbance within 50 feet of the landward extent of wetlands as set forth in Rule 62-340, with the exception of pilings for docks or piers. There shall be no buildings, pools, ponds, or other structures in this protection zone. There shall be no septic tanks within 75 feet of the landward extent of wetlands as set forth in Rule 62-340. All development shall be subject to the building setback requirements regarding the shoreline protection zone established in the Town’s Land Development Regulations.

**POLICY 1.3.7: Upland Vegetative and Wildlife Habitat Protection.** Upland vegetative communities and wildlife habitats (particularly those identified as primary habitat for endangered or threatened species) for which the Town or State deems environmentally significant shall be protected from adverse impacts associated with development. Upland areas identified within the Conservation Element as essential breeding, feeding or habitat sites for endangered or threatened flora or fauna creatures shall be protected according to the following activities:

a. **Conservation Designation.** Important upland habitat may be designated as conservation under the following circumstances:

1. The site is owned by a government body or agency;
2. The site is programmed for purchase by a government agency within the first three years of the Five-Year Schedule of Capital improvements; and
3. A request to designate the site as conservation is made by the land owner.
4. The Town requires the designation as a part of the development review process.

Development proposed to occur within areas designated as Conservation are subject to all policies pertaining to open space requirements and development restrictions.
b. **Sites with Endangered or Threatened Species.** Any areas identified within the Conservation Element as refuge, breeding, feeding, or habitat areas of endangered or threatened species shall be subject to the following activities:

1. An applicant of a property designated for development shall prepare a Critical Habitat Management Plan prepared by a professional biologist, ecologist, or other related professional. As a minimum, this Plan shall analyze the following issues:

   a.) Affected species;
   b.) Land needs to support continued on-site presence of the species;
   c.) Impacts of proposed development which will disturb the species;
   d.) Recommended management plans and measures necessary to protect the subject species; and
   e.) Cost to developer to implement the recommended management plan.

The adequacy of the study shall be determined by the Town of Howey-in-the-Hills. The final development plan shall conform to recommendations determined within the study as approved by the Town Council. The Town will reserve the right to have a State agency review the Critical Habitat Management Plan and provide a written response.

**POLICY 1.3.8:** **Historically Significant Sites.** The Town shall use the Florida Master Site File as a resource to identify archeological resources and historically significant structures. The Howey House and any other historically significant sites listed on the Florida Master File or the National Register of Historic Places shall be identified on the Future Land Use Map Series. In addition, the Town shall also distinguish buildings as historic if the following criteria are met [9J-5.006(3)(c)(8), F.A.C.]:

   a. The age of the subject site exceeds fifty years;
   b. Whether the building, structure, or object represents the last remaining example of its kind in the neighborhood or Town;
   c. Whether documented proof indicates that the site played a significant role in the history of Howey-in-the-Hills, Lake County or the State of Florida.
If type, density and intensity of adjacent land use shown on the Future Land Use Map is not compatible to the preservation of the historic site, then appropriate buffering and screening techniques shall be requirements imposed on encroaching adjacent new development. Such requirements shall be stipulated within the Land Development Regulations.

**POLICY 1.3.9:**  
*Rehabilitating, Relocating, or Demolition of Historic Sites.* Criteria established in the Land Development Regulations pertaining to the rehabilitation or relocation of a designated historic structure shall follow the U.S. Secretary of the Interior’s “Illustrated Guidelines for Rehabilitating Historic Buildings”. Additional criteria for approving the relocation, demolition, or rehabilitation of a historic structure shall include the following factors [9J-5.006(3)(c)8, F.A.C.]:

a. the historic character and aesthetic interest the building, structure, or object and how it contributes to its present setting;
b. whether there are definite plans for the area to be vacated and the effect of those plans on the character of the surrounding neighborhood;
c. whether the building, structure, or object can be moved without significant and irreversible damage to its physical integrity;
d. whether the building, structure, or object represents the last remaining example of its kind in the neighborhood or Town;
e. whether definite plans exist to reuse the subject property if a proposed demolition is carried out, and the effect of those plans on the character of the surroundings; and
f. whether reasonable measures can be taken to save the building, structure, or object to a level safe for occupation.

**POLICY 1.3.10:**  
*Preventing Destruction of Discovered Archaeological Sites.* Development shall cease construction activities on a development site when artifacts are uncovered during either land preparation or construction. The developer shall notify the Town of such potential discovery, and the Town and / or developer shall contact the Florida Department of State of such discovery. Construction shall not begin until the State has determined the archaeological significance of the discovery and the restrictions which shall be
imposed on development. Development may continue in areas which will not impact the site of the discovery.

OBJECTIVE 1.4: **Commercial Planning Activities.** Ensure the Town’s sustainability by allocating sufficient land area to accommodate commercial activities which provide a level of employment as well as goods and services demanded by local residents and guest with consideration to fiscal and environmental impacts to the Town of Howey-in-the-Hills.

**POLICY 1.4.1:** **Location and Distribution of Commercial Sites.** The location and distribution of commercial land use districts delineated on the *Future Land Use Map* shall be determined according to the following criteria:

a. Promote mixed use land use categories to prevent strip commercial centers and reduce the dependability on the automobile;

b. Promote the integration of uses to include live-work environments;

c. Ability to comply with adopted performance standards for preventing or minimizing nuisance impacts, such as emission of air pollutants, noise, odor, and generation of hazardous waste or products;

d. Impact to the conservation and preservation of natural resources;

e. Demand on existing and planned public services, utilities, water resources and energy resources;

f. Impact on designated scenic and aesthetic transportation corridors;

g. Compatibility with surrounding land uses;

h. The size of each individual business permitted in the Neighborhood Commercial, Village Mixed Use, or Town Center Mixed Use land uses shall comply with the guidelines established within the Policy 1.4.6; and

i. The height of each business permitted in the Neighborhood Commercial, Village Mixed Use, or Town Center Mixed Use land uses shall comply with the guidelines established in Policy 1.4.7 of this *Element*.

**POLICY 1.4.2:** **Screening Requirement.** The Town shall require new commercial, light industrial, and manufacturing development to install landscaping, visually obstructive fencing or man-made berms, or other appropriate screening techniques concealing the commercial, light industrial, or manufacturing site from areas designated for
low or medium density residential if the proposed commercial, light industrial, or manufacturing building is not compatible.

**POLICY 1.4.3:** *Availability of Facilities to Support Commercial Development.*
The density and intensity of commercial uses shall be compatible with the ability of public facilities to provide adequate services according to adopted level of service standards. [9J-5.006(3)(c)3, F.A.C.]

**POLICY 1.4.4:** *Provision of Open Space.* All new commercial development shall be subject to the open space standards established in Policy 1.2.2 of this Element. [9J-5.006(3)(c)4, F.A.C.]

**POLICY 1.4.5:** *Maximum Intensity of Commercial Uses.* Maximum intensity of use for commercial development is outlined within the respective land use categories and further refined in the Land Development Regulations.

**POLICY 1.4.6:** *Commercial Building Size Limitations.* Individual businesses within the Town Center Mixed Use and Neighborhood Commercial shall be limited to 5,000 sq. ft. Individual businesses within the Village Mixed Use land uses shall be limited to 30,000 sq. ft. Unless a special exception is granted to the developer by the Town Council, these guidelines shall be used to determine the maximum allowable size for all new commercial buildings in Town.

**POLICY 1.4.7:** *Commercial Building Height Limitations.* Commercial buildings within the Town Center Mixed Use, Village Mixed Use, and Neighborhood Commercial land uses shall be limited to a maximum of two stories and 35 feet in height.

**POLICY 1.4.8:** *Acceptable Uses within Commercial Areas.* Activities allowed within areas designated for commercial uses established in the Town Center Mixed Use, Village Mixed Use, or Neighborhood Commercial land uses shall be limited to the following:

1. Retail business (no drive-thru establishments in the Town Center Mixed Use);
2. Community centers and fraternal lodges;
3. Hotels or motels;
4. Marinas;
5. Service businesses, Personal Services such as barber/beauty, personal training, spa, salons, pottery shops, art/painting galleries or studios, dance studios, etc.;
6. Professional and Business offices;
7. Veterinarian offices, provided the facility has no outside kennels;
8. Financial Institutions and banks;
9. Residential development, low, medium, or high density (second story);
10. Recreation and Parks;
11. Manufacturing, as permitted according to policies cited in this Element;
12. Elementary and middle schools in the Neighborhood Commercial land use; and
13. Elementary, middle, and high schools in the Village Mixed Use land use.

A more detailed matrix is available in the Land Development Regulations.

POLICY 1.4.9: Strip Commercial Development and State Road 19 and County Road 48. The Town shall discourage strip commercial style development from occurring along State Road 19 and County Road 48. Prior to the approval of each proposed annexations along the State Road 19 and County Road 48 corridors, the Town shall consider the potential of a strip commercial style development being established as a direct result of such annexation.

POLICY 1.4.10: Adequate Commercial Land and the Future Land Use Map. The Town will ensure that adequate land is designated on the Future Land Use Map to support the commercial needs of the residents and guests of Howey-in-the-Hills during the short-range (2011-2015) and long-range (2025) planning period. All such lands shall be compatible and consistent with the surrounding land uses.

OBJECTIVE 1.5: Limiting Manufacturing Land Uses. Limit manufacturing land uses within the Town due to the presence of high aquifer recharge areas and lack of central sanitary sewer facilities.

POLICY 1.5.1: Manufacturing as a Conditional Use in Light Industrial Designations. The Town shall permit non-polluting manufacturing land uses within Light Industrial land use designations on a conditional basis.
POLICY 1.5.2: **Acceptable Manufacturing Uses.** Manufacturing uses allowed within Light Industrial designations shall be limited to those primarily involved with the assembly of goods and products processed without the use of excessive chemicals, heat, or machinery. Activities which might be obnoxious or offensive by reason of emission of odor, dust, smoke, gas or noise beyond the building are prohibited.

POLICY 1.5.3: **Maximum Intensity of Use.** Maximum intensity of use for manufacturing uses shall be 0.70 for the impervious surface coverage and 0.60 for the floor area ratio. [9J-5.006(3)(c)7, F.A.C.]

OBJECTIVE 1.6: **Public Services and Facilities.** To assure that needed public services and facilities are developed concurrent with the impact of new development. [9J-5.006(3)(b)1, F.A.C.]

POLICY 1.6.1: **Coordinating Public Facilities with Land Use.** The Town shall extend public facilities only to existing and proposed land use activities, as shown on the Future Land Use Map, which shall require and demand such services. Undeveloped land shall not be designated for development without assurance through the Comprehensive Plan that public facilities shall be available concurrently with the impacts of development. The impacts of land uses, including their densities and intensities, shall be coordinated with the Town’s ability to finance or require provision of necessary public facilities at conditions at or exceeding the adopted minimum level of service standards. [9J-5.006(3)(c)3, F.A.C.]

POLICY 1.6.2: **Coordinating Public Facilities with Concurrency Management System.** The timing and location of public facilities shall be coordinated with the Town’s Concurrency Management System to assure that development occurs in an orderly and timely manner consistent with the availability of facility capacities. [9J-5.006(3)(c)3, F.A.C.]

POLICY 1.6.3: **Land Use Allowed within Wellfield Protection Zones.** A wellfield protection zone shall be established within a radius distance of seventy five, two hundred, and five hundred feet from potable water wells. The following guidelines apply to the wellhead protection zone:
a. No new development (except facilities related to the public water system) shall be permitted within one-hundred and fifty feet from a well.

b. Within a two hundred foot radius distance, septic tanks, sanitary sewer facilities, or solid waste or disposal facilities shall be prohibited.

c. Within a five hundred foot radius of a well, manufacturing or light industrial uses shall be prohibited, including activities that require the storage, use handling, production or transportation of restricted substances; agricultural chemicals, petroleum products, hazardous/toxic wastes, industrial chemicals, etc. In addition, wastewater treatment plants, percolation ponds, mining activities and similar activities are prohibited. Low density single family, commercial, retail, and office land uses shall be allowed within the 500 foot zone for potable water wells.

d. All wells and wellhead protection zones shall be delineated on the Town’s Existing and Future Land Use Maps. [9J-5.006(3)(c)6, F.A.C.]

**POLICY 1.6.4:** Public Facility and Service Standards. The Town shall continue to ensure that public facilities and services meet or exceed the standards established in the Capital Improvements Element required by Chapter 163.3177, F.S. and are available when needed for the development, or that development orders and permits are conditioned on the availability of these public facilities and services necessary to serve the proposed development. [9J-5.006(3)(c)3, F.A.C.]

**POLICY 1.6.5:** Meeting LOS Standards. The Town shall require, prior to approval of a building permit and/or development order, that the locally established “Level of Service of Standards” are being met or that facility improvements will be available concurrently with the impact of new construction or development such that level of service standards are maintained. [9J-5.006(3)(c)3, F.A.C.]
OBJECTIVE 1.7: Land Use Coordination and Soils and Topography. To require that soil conditions, topography, and availability of facilities and services are coordinated with land uses [9J-5.006(3)(b)(1), F.A.C.].

   POLICY 1.7.1: Coordinating Future Land Uses with Soil Conditions. Land use activities, including their densities and intensities, shall be compatible to soil types whose properties are capable of supporting the structures, parking areas, ancillary uses, and facilities proposed to be placed on them.

   In the event the Future Land Use Map identifies a land use allowed within an incompatible soil type, a field study may be performed on the site by a professional hydrologist, registered engineer, or other similar profession to delineate actual boundaries and soil types exhibited on the subject site. The Town shall reserve the right to have such a field study verified by the local U.S. Soil Conservation Office or a comparable State agency.

   POLICY 1.7.2: Engineering Practices, Topography, and Soils. The Town shall maintain a unified Land Development Code and continue to require that sound engineering practices are required with respect to the topography and soil conditions, prior to the approval of development activities in Town.

OBJECTIVE 1.8: Coordination of Land Patterns, New Development, and the Concurrency Management System. Assure that future land use patterns and new development in Howey-in-the-Hills are coordinated consistently with the Town’s Concurrency Management System.

   POLICY 1.8.1: Availability of Public Facilities. Development orders and permits shall not be issued unless the necessary facilities and services are available concurrent with the impacts of development. Future land use allocations, including their related densities and intensities, shall not exceed the financial and legal ability of the Town to provide or require provision of public facilities to serve those land uses delineated on the Future Land Use Map. The Town’s Concurrency Management System shall be used to determine whether adequate public facility capacities are available to meet the demands generated by new development and redevelopment. [9J-5.006(3)(c)3, F.A.C.]

   POLICY 1.8.2: Efficiency in the Provision of Public Facilities. Allocation of future land use shall occur in a manner which promotes efficient distribution and provision of public facilities. Land use allocations
shall assure that future sites can be acquired for public facilities programmed within the Five-Year Schedule of Capital Improvements or determined necessary to meet demands generated by growth and development anticipated during the short-range (2011-2015) and long-range (2025) planning periods. [9J-5.006(3)(c)3, F.A.C.]

POLICY 1.8.3: Mandatory Compliance with the Concurrency Management System. The Town shall issue no development order or permit for development unless the applicant demonstrates that impacts associated with the proposed development meet criteria set forth within the Town’s Concurrency Management System. All applicants of development shall demonstrate through narrative and graphic information that [9J-5.006(3)(c)3, F.A.C.]:

1.) necessary facilities and resources are in place and functional concurrent with the impacts of development; and

2.) the subject development shall not reduce the levels of service below the minimum adopted standard established in the Public Facilities Element policy for each applicable public facility.

For proposed developments which shall require public facilities or services provided by the Town, no development order or permit for development shall be issued until a maximum capacity for a public facility is assigned to and reserved for the subject development. The reservation of capacity for a public facility shall be granted to an applicant of development only upon satisfactory compliance with the Town’s Concurrency Management System and other applicable ordinances. All rights pertaining to the assignment and forfeit of capacity allocations shall be defined within the Town’s Concurrency Management System.

POLICY 1.8.4: Amendments to the Comprehensive Plan. The Town shall require all applicants pursuing an amendment to the Future Land Use Map to demonstrate that all facilities or service capacities are currently available, and shall be available concurrent with the impacts of development. Any necessary facilities or services shall be part of the 5-year CIP or the Long-range Capital Plan. An amendment to the Future Land Use Map shall not constitute the reservation of capacity for any public facility. Reservation of capacities shall only be granted to development orders or permits which demonstrate specific impacts which a development will place on
public capacities. The Town shall consult with the St. Johns River Water Management District, prior to the approval of a building permit or its functional equivalent, to determine whether adequate water supplies and related facilities to serve new development will be available no later than the anticipated date of issuance by the Town a certificate of occupancy or its functional equivalent.

OBJECTIVE 1.9: Blighted Areas. Blighted areas shall be redeveloped and the Town shall take the necessary action to prevent or limit their occurrence. [9J-5.006(3)(b)(2), F.A.C.]

POLICY 1.9.1: Amending the Comprehensive Plan to Address Blighted Areas. At the time blighted areas are identified within Howey-in-the-Hills, the Town shall amend the Comprehensive Plan to include appropriate policies which address the redevelopment needs of that area. Such policies shall be based on an evaluation and analysis which shall be prepared within the Date Inventory and Analysis Section. The Town shall also re-evaluate the future land use designation for the blighted area to determine if a more appropriate designation, density and intensity of development would better encourage the private section to invest in redevelopment.

POLICY 1.9.2: Identifying Blighted Areas. The Town shall annually survey all areas of the Town to determine if blighted areas are occurring.

POLICY 1.9.3: Code Enforcement. The Town shall enforce its Codes to require needed improvements within the Town and discourage the creation of blighted areas in Town.

OBJECTIVE 1.10: Urban Sprawl. Discourage urban sprawl through a future land use pattern which promotes orderly, compact development. [9J-5.006(3)(b)(8), F.A.C.]

POLICY 1.10.1: Promote Orderly, Compact Growth. Land use patterns delineated on the Future Land Use Map shall promote orderly, compact growth. The Town shall encourage growth and development in developed areas where public facilities and services are presently in place, and in those areas which public facilities can provide the most efficient service. [9J-5.006(3)(c)10, F.A.C.]

POLICY 1.10.3: Coordination with Lake County. The Town of Howey-in-the-Hills shall coordinate with Lake County to promote a regional development concept that directs future growth to urbanized or urban/rural transitional areas where public facilities and services
are available or proposed to be available as required in the Town’s Concurrency Management System. [9J-5.006(3)(c)10, F.A.C.]

**OBJECTIVE 1.11: Innovative Land Development Applications.** Future growth and development shall be managed through the preparation, adoption, implementation and enforcement of innovative land development regulations. [9J-5.006(3)(b)(10), F.A.C.]

**POLICY 1.11.1: Use of Mixed Use Developments.** To discourage urban sprawl and to maximize existing and planned public facilities, the Town has adopted the Village Mixed Use and Town Center Mixed Use land uses.

Mixed Use designations may include single family, multiple family, commercial, recreation, open space and institutional land uses not to exceed development densities and intensities of use established for these land uses in this Element. [9J-5.006(3)(c)5, F.A.C.]

**POLICY 1.11.2: Use of Cluster Developments.** As a means to promote the conservation of permeable surface area and maintain the Town’s rural character, cluster developments shall be promoted by the Town during the development review process. Developers of Mixed Use/(Planned Unit Developments) and residential subdivisions shall be encouraged to cluster development in order to preserve open space.

**POLICY 1.11.3: Maintaining Innovative Land Development Regulations.** The Town shall maintain innovative land development regulations that encourage mixed-use developments and incorporate site design planning techniques that will enhance the quality of large scale developments or redevelopment area(s). [9J-5.006(3)(c)5, F.A.C.]

**POLICY 1.11.4: Establishing Architectural Guidelines.** By December 2012, the Town shall amend the Land Development Regulations to establish architectural guidelines for the Town Center Mixed Use and Village Mixed Use land use to maintain the unique and hometown charm of Howey-in-the-Hills. The Town shall encourage historical and traditional styles native to the Howey-in-the-Hills area and new and innovative architectural design when appropriate.

**POLICY 1.11.5: Requiring Underground Utilities.** The Town shall require all new subdivisions, residential and commercial developments, approved after the adoption of this Comprehensive Plan, to have...
underground telephone, cable and electrical utility lines to provide a more attractive, efficient, and safer development.

**POLICY 1.11.6:** New Development Following the Town’s Existing Street Grid Pattern. The Town shall require all new subdivisions, residential and commercial developments, approved after the adoption of this Comprehensive Plan, to follow the Town’s existing street grid pattern when appropriate. By December 2012, the Town shall amend the Land Development Regulations to ensure that such street grid pattern requirements are addressed.

**OBJECTIVE 1.12:** Identifying a Defined Planning Area. To identify an area surrounding the existing Town limits as the defined planning area for the Town.

**POLICY 1.12.1:** Defined Planning Area Definition. To protect the Town’s unique charm and hometown character, the Town hereby adopts the Utility Service Area as the maximum planning area (see the Town’s Utility Service Area Map). The Town shall not annex outside this boundary.

**POLICY 1.12.2:** Defined Planning Area and Concurrency. All land within the defined planning area established in Policy 1.12.1 that annexes into the Town shall be subject to the Town’s adopted Concurrency Management System and level of service standards. Prior to the approval of annexing land within the defined planning area, the Town shall ensure that timely development occurs before the annexation and connection to the Town’s utility service system is made available. The Town shall also ensure that the availability of public infrastructure is made only to proposed developments that are adjacent to existing developments within the Town as opposed to sporadic “leap frog” development resulting in urban sprawl. [9J-5.006(3)(c)3, F.A.C.]

**OBJECTIVE 1.13:** Electric Infrastructure. To maintain, encourage, and ensure adequate and reliable electric infrastructure is readily available in the Town.

**POLICY 1.13.1:** Permitting New Electric Distribution Substations. The Town shall allow new electric distribution substations in all land use categories except Conservation. The Town shall, if possible, avoid locating substations where they would be incompatible with adjacent land uses [Chapter 163.3208 (4), F.S.].

**POLICY 1.13.2:** Compatibility of New Electric Distribution Substations. The Town shall require the compatibility of new electric distribution

Adopted on October 11, 2010
Ordinance No. 2010-007
substations with surrounding land uses (including heightened setback, landscaping, buffering, screening, lighting, etc.) as part of a joint public/private site planning effort. [9J-5.006(3)(c)2, F.A.C.]

**POLICY 1.13.3:** *New Electric Distribution Substation Standards.* The following standards shall apply to new distribution electric substations:

In nonresidential areas, the substation must comply with the setback and landscaped buffer area criteria applicable to other similar uses in that district, if any.

Unless the Town Council approves a lesser setback or landscape requirement, in residential areas, a setback of up to 100 feet between the substation property boundary and permanent equipment structures shall be maintained as follows:

1. For setbacks between 100 feet and 50 feet, an open green space shall be formed by installing native landscaping, including trees and shrub material, consistent with the relevant local government's land development regulations. Substation equipment shall be protected by a security fence consistent with the Town's Land Development Regulations.

2. For setbacks of less than 50 feet, a buffer wall 8 feet high or a fence 8 feet high with native landscaping consistent with the relevant local government's regulations shall be installed around the substation.

**POLICY 1.13.4:** *New Electric Distribution Substation Compliance.* All new distribution electric substations in Town shall comply with the guidelines and standards established in Chapter 163.3208, F.S.

**OBJECTIVE 1.14:** *Consistency and Compatibility with the Adopted Comprehensive Plan.* To ensure the Town’s Land Development Regulations, Zoning Districts, and Performance Standards are consistent with and compatible to the adopted Comprehensive Plan.

**POLICY 1.14.1:** *Land Development Regulations Consistency.*

The Land Development Regulations for the Town of Howey-in-the-Hills shall be consistent with, and serve to implement the goals, objectives and policies established within the adopted Comprehensive Plan. To implement the goals, objectives and policies of the adopted Comprehensive Plan, provisions shall be incorporated into the Land Development Regulations, by
December 2012, pursuant to Chapter 163.3202, F.S., and shall contain specific and detailed provisions which as a minimum:

a. Regulate the subdivision of land;

b. Regulate the use of land and water consistent with this Element, ensure the compatibility of adjacent land uses, and provide for open space;

c. Protect the environmentally sensitive lands designated in the Comprehensive Plan, particularly those identified in the Future Land Use Map series;

d. Regulate development within areas which experience seasonal and periodic flooding;

e. Specify drainage and stormwater management requirements;

f. Protect potable water wellfields and aquifer recharge areas;

g. Specify minimum design standards for sanitary sewer and septic tank systems;

h. Regulate signage;

i. Ensure safe and convenient on-site and off-site traffic flow and parking needs of motorized and non-motorized transportation;

j. Require that development meet all appropriate provisions of the Town’s Concurrency Management System, including level of service standards adopted by the Town Council, prior to the issuance of a development order or permit; and

k. Provide that public facilities and services meet or exceed the standards established in the capital improvements element required by Chapter 163.3177, F.S. and are available when needed for the development, or that development orders and permits are conditioned on the availability of these public facilities and services necessary to serve the proposed development.

POLICY 1.14.2: Consistency of Zoning Districts with the Future Land Use Map. The Town may elect to further regulate land use activities within
land use districts shown on the *Future Land Use Map* through the establishment of zoning districts. Such zoning districts shall be defined within the Land Development Regulations, and a Zoning Map shall illustrate the demarkations of each district. The density and intensity of land use activities established for each zoning district shall be consistent with density and intensity qualitative standards set forth on the *Future Land Use Map* for the associated land use district.

Land development regulations adopted to implement this *Comprehensive Plan* shall be based on and be consistent with the residential densities and non-residential intensities established herein.

**POLICY 1.14.3:** *Consistency with Performance Standards.* Performance standards established within the Land Development Regulations shall be consistent with the goals, objectives and policies established within the *adopted Comprehensive Plan*. By December 2012, the Land Development Regulations shall be amended to ensure that the performance standards comply with the adopted *Comprehensive Plan*.

**OBJECTIVE 1.15:** *Protection of Natural Resources.* To ensure the protection of natural resources in the Howey-in-the-Hills area. [9J-5.006(3)(b)4, F.A.C.]

**POLICY 1.15.1:** *Policies for Managing Environmentally Sensitive Areas.* Policies in the *Conservation Element* for managing environmentally sensitive natural systems, including but not limited to Little Lake Harris, Lake Illinois, wetlands, floodplain areas, significant vegetative communities and wildlife habitats of endangered and threatened species, shall be implemented through performance standards stipulated in the Land Development Regulations.

**POLICY 1.15.2:** *Intergovernmental Coordination and Natural Resource Management.* The Town shall coordinate with State agencies including, the St. Johns River Water Management District, the Florida Department of Environmental Protection, and the East Central Florida Regional Planning Council as well as Lake County and other agencies concerned with managing natural resources for the purpose of protecting the function and existence of natural systems.

**POLICY 1.15.3:** *Protection of Endangered and Threatened Animal and Plant Species.* The Town shall protect endangered and threatened
animal and plant species by assuring the preservation of native habitat required for their propagation and survival. Policies pertaining to the adoption of performance standards and development regulations, as herein cited in this Comprehensive Plan shall implement the protection of habitat used by these species.

OBJECTIVE 1.16: Compatible and Consistent Land Uses. To ensure that land uses are compatible and consistent with surrounding land uses. [9J-5.006(3)(b)3., F.A.C.]

POLICY 1.16.1: Existing Non-Compatible Land Uses. The Town shall reduce or eliminate existing non-complying land use activities to the greatest reasonable and practical extent without intruding on the constitutional rights of the effected land owners. No existing non-conforming structure shall be increased or expanded. The Land Development Regulations shall define circumstances under which the existing non-conforming use shall be eliminated or reduced in intensity, and shall provide principles for regulating improvements to existing non-complying structures as well as changes to non-conforming uses. [9J-5.006(3)(c)2., F.A.C.]

POLICY 1.16.2: Managing Future Land Use. The Future Land Use Map and related policies together with the Land Development Code shall be applied as a planning and management tool in order to prevent development of land uses which do not conform to the Town’s character as reflected in the Town’s adopted Future Land Use Map, Zoning Map, and other applicable laws, ordinances, and administrative rules.

OBJECTIVE 1.17: Renewable Energy Resources. To encourage the development and use of renewable energy resources, efficient land use patterns, and reducing greenhouse gas emissions in order to conserve and protect the value of land, buildings, and resources, and to promote the good health of the Town’s residents. [9J-5.006(3)(b)(12), (3)(b)(13), and (3)(b)(14), F.A.C.]

POLICY 1.17.1: Energy Efficient Land Use Pattern. The Town shall maintain an energy efficient land use pattern and shall continue to promote the use of transit and alternative methods of transportation that decrease reliance on the automobile. [9J-5.006(3)(c)(11), F.A.C.]

POLICY 1.17.2: Promoting Walking and Bicycling. The Town shall continue to encourage and develop the “walk-ability and bike-ability” of the Town as a means to promote the physical health of the Town’s residents, access to recreational and natural resources, and as a

POLICY 1.17.4: Solar Collectors. No action of the Town shall prohibit or have the effect of prohibiting solar collectors, or other energy devices based on renewable resources from being installed on a building and as further set forth within Section 163.04, Florida Statutes. [9J-5.006(3)(c)(13), F.A.C.]

POLICY 1.17.5: Construction of Public Facilities and Buildings. Public buildings and facilities shall be constructed, and adapted where reasonably feasible to incorporate energy efficient designs and appropriate “green” building standards. Green Building standards that should be observed are contained in the Green Commercial Buildings Designation Standard, Version 1.0, published by the Florida Green Building Coalition, Inc. [9J-5.006(3)(c)(11), F.A.C.]

POLICY 1.17.6: Energy Efficient Design and Construction Standards. The Town shall continue to promote and enforce energy efficient design and construction standards as these become adopted as part of the State Building Codes. The Town shall also promote commercial and residential standards that are promulgated from time to time by the Florida Green Building Coalition, Inc. [9J-5.006(3)(c)(11), F.A.C.]

POLICY 1.17.7: Promoting Mixed Use Developments. The Town shall continue to promote mixed-use developments in areas planning for urban development or redevelopment as a mean to produce energy efficient land use patterns and reduce greenhouse gas emissions. [9J-5.006(3)(c)(11) and (3)(c)(12), F.A.C.]

POLICY 1.17.8: Development Incentives for Smart Growth Development. The Town shall revise its Land Development Regulations by December 2012 to offer incentives and flexibility for development projects that will make development application, review and approval processes easier, faster and more cost effective for projects that are consistent with the Smart Growth Principles of the Comprehensive Plan and that can be demonstrated to reduce infrastructure costs, promote the preservation of open space and habitat lands, provide
energy efficient land use patterns, and reduce greenhouse gas emissions. Other incentives shall also be evaluated for projects that participate in energy-efficient development programs such as:

- U.S. Environmental Protection Agency's Energy Star Buildings and Green Lights Program to increase energy efficiency through lighting upgrades in buildings;
- Rebuild America;
- Building for the 21st Century;
- Energy Smart Schools;
- National Industrial Competitiveness through Energy;
- U.S. Department of Environmental Protection's Pollution Prevention (P2) Program;
- U.S. Green Building Council (LEED);
- Florida Water StarSM Program; or
- Florida Green Building Coalition (FGBC), including pursuing certification as a Green Government.

**OBJECTIVE 1.18: Mechanism to Manage Growth and Development.** To ensure that the *Comprehensive Plan* represents the primary mechanism which manages growth and development within the Town of Howey-in-the-Hills.

**POLICY 1.18.1: Precedence Over Other Land Use Control Mechanisms.** Growth management and land use controls stipulated in the adopted *Comprehensive Plan* through goals, objectives and policies shall take precedence over all other land use policies established in other land use control mechanisms adopted by the Town of Howey-in-the-Hills, including but not limited to the Land Development Regulations and other components of the Code of Ordinances. By December 2012, the standards, provisions, and restrictions stated in the Land Development Regulations and the Code of Ordinances shall be consistent with the goals, objectives and policies of the adopted *Comprehensive Plan*.

**POLICY 1.18.2: Growth Management through Adoption of Revised Land Development Regulations.** The Town shall revise the Land Development Regulations by December 2012 to reflect growth management controls established within the updated *Comprehensive Plan*. Until the adoption of the revised Land Development Regulations, all land use decisions made by the Town of Howey-in-the-Hills shall be consistent with the goals, objectives and policies of the *Comprehensive Plan*. The Town Council shall hold the right to determine development regulations
and standards until the Land Development Regulations are completed and adopted, so long as decisions are consistent with the Comprehensive Plan.

**POLICY 1.18.3: Compliance with State and Federal Laws.** The Comprehensive Plan shall not violate Statutes established in Florida Law or Administrative Rule, nor shall it violate the Constitution of the State of Florida or that of the United States of America.
